

# TONICSEA™ Cortisol Pro

PUT YOUR STRESS IN BALANCE

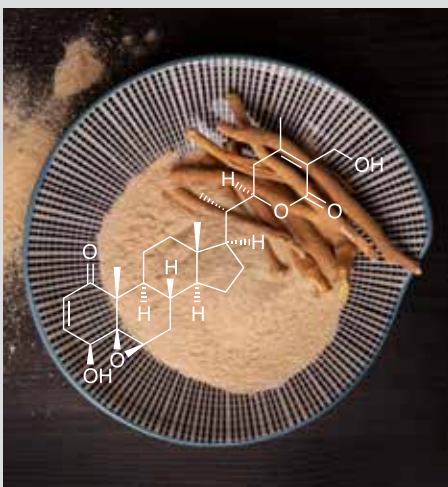

## Keep Cortisol Levels Where They Should Be

TonicSea Cortisol Pro is a plant-powered stress support supplement that contains two patented adaptogens clinically proven to promote relaxation and support healthy cortisol levels: Relora® (*Magnolia officinalis* and *Phellodendron amurense* bark extracts) and Sensoril® ashwagandha.\* Combined with other known adaptogens rhodiola root and maral root, Cortisol Pro helps support healthy stress and cortisol levels.\* High cortisol levels disrupt sleep, cause weight gain, and reduce mood. Cortisol Pro helps your body resist and recover from the effects of stress when you need it most.\* An expansive body of clinical research supports these patented nutrients and their ability to support adapting to physical and mental stressors.\*

## Delivering an Unexpected Stress-Busting Triad

Stress is unavoidable, but that doesn't mean you have to let it impact your mood or energy levels. Cortisol Pro works with your body to help you recover from and adapt to unresolved stress with support from adaptogens and amino acids.\* Relora® is a proprietary blend of magnolia bark extract and phellodendron bark extract that promotes relaxation and supports healthy cortisol levels.<sup>1</sup> On the other hand, Sensoril® ashwagandha has been the subject of 12 clinical studies and was shown to support increased energy, boost mood, and support focus.\*<sup>2</sup> The addition of Suntheanine® further supports the central nervous system. Suntheanine® is a patented form of L-theanine that has been featured in more than 200 clinical studies. L-theanine is able to cross the blood-brain barrier and helps support cognitive function while promoting restful sleep and relaxation.\*<sup>3</sup>

## Harness the Full Power of Ashwagandha

Ashwagandha has been used for thousands of years to promote relaxation as an adaptogen — a special class of plants known to help the body adapt to stress.\* Sensoril® ashwagandha is grown on a family-owned farm. Where most supplements only use the root for its benefits, Sensoril® takes it one step further and supplies nutrients from the root and the leaves for maximum impact. It also contains the highest level of ashwagandha bioactives available on the market, including glycosides, Withaferin A, and oligosaccharides. Multiple clinical studies have shown the effectiveness of Sensoril® in promoting relaxation and supporting cognitive function.\*<sup>4</sup>
