

TONICSEA™ NutraZyme

All-Day Energy

TonicSea NutraZyme supports the digestion and absorption of proteins, fats, and carbohydrates by supplying the body with a combination of proteolytic enzymes and antioxidants.* The enzymes in NutraZyme work to encourage healthy digestive function, ensuring you receive optimal nutrition from food and create long-lasting energy.* The body produces proteolytic enzymes in the pancreas and stomach. These enzymes are known for their role in digestion and other vital processes. The enzymes in NutraZyme help reinforce enzymatic activity in the body to optimize the breakdown of food and promote efficient nutrient use.*

To properly digest food, the body needs certain enzymes to break down nutrients. Unfortunately, cooking food kills valuable enzymes that assist with digestion. TonicSea NutraZyme is a therapeutic enzyme formula developed with clinically researched proteolytic enzymes, antioxidants, and plant-based enzymes. These enzymes and nutrients are essential for helping the body absorb and break down proteins, fats, and carbohydrates more effectively to promote healthy digestion.* In addition, the enzymes in NutraZyme support immune health.*

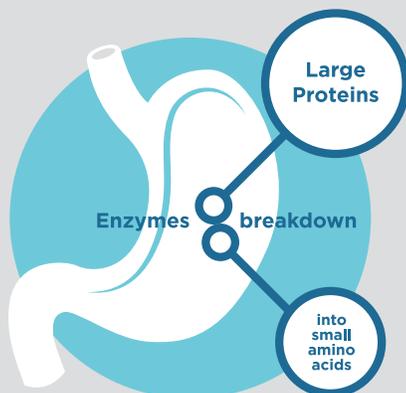

Enzymes for Every Day

NutraZyme contains a mixture of digestive enzymes, including pancreatin, which is a blend of lipase, amylase, and protease:

- **Lipase** assists with breaking down fats that can negatively impact pancreatic health.¹ This is important because when the body does not break fats down properly, it can lead to gastrointestinal discomfort.*
- **Amylase** helps turn complex carbohydrates into simple sugars, which your body uses to produce energy.² It also promotes the complete digestion of carbohydrates.*
- **Protease** is a proteolytic enzyme that helps your body digest protein, which plays a significant role in healthy digestion.*³

NutraZyme also contains known plant-based proteolytic enzymes bromelain and papain, two enzymes present in pineapple fruit that encourage protein digestion.* Furthermore, rutin is a flavonoid found in citrus fruit that helps reduce oxidative stress and supports tissue repair.*⁴

All of these enzymes work together synergistically and play different roles in the body.

How Do Proteolytic Enzymes Work?

Enzymes are needed for every chemical reaction in the body. Proteolytic enzymes are produced by the stomach and pancreas and assist the body with cell division and processing proteins. Proteolytic enzymes break down large proteins into small amino acids that can be easily absorbed and digested, ensuring that the body receives optimal nutrition from food.* This process helps the body create long-lasting energy, and it also helps regulate immune response.*

How to Use:

Take three capsules per day or as directed by your healthcare practitioner.

40 Servings

Supplement Facts

Serving Size: 3 Capsules
Servings Per Container: 40

	Amount Per Serving	%DV**
Enzyme Blend 5-10731	915 mg	**
Pancreatin 8x (Porcine)		
Bromelain 225FIP (from <i>Ananas comosus</i>)		
Papain 164FIP (from <i>Carica papaya</i>)		
Rutoside 3H20 (Rutin) <i>Sophora japonica</i>		
Peptizyme SP-EN 5000		

**Daily Value (DV) not established.

Other Ingredients: Microcrystalline Cellulose, Acid-Resistant Vegetable Capsule (Hydromellose, Gellan Gum), Magnesium Stearate.

Features & Benefits

Supports immune health*
Promotes tissue repair*
Supports nutrient absorption*
Dairy-free
Non-GMO

Key Ingredients

Enzyme blend: A potent blend of key digestive enzymes, including pancreatin, bromelain, papain, and rutin.

The TonicSea Difference

A robust immune system begins with efficient digestion. NutraZyme by TonicSea provides powerful enzymes that increase the quality of digestion and promotes immune function.* TonicSea continually works to discover new ways to deliver the most advanced nutrients for health. Every NutraZyme serving contains 915 mg of concentrated enzymes for optimal nourishment.*

Caution: If you are pregnant or nursing, consult with your healthcare practitioner before use. Keep out of reach of children.

Storage: Keep tightly closed in a cool, dry place.
