

Ultimate Fat Burner

Metabolism Support for
Healthy Body Composition[†]

The ingredients in Ultimate Fat Burner have thermogenic properties to help support healthy metabolism and body composition.^{†1,2,3,4} Clinical studies demonstrate the ability of chromium picolinate, L-carnitine, and African mango extract to promote energy metabolism by burning fat.^{†1,3,5} The ingredients act on specific receptors and chemicals in the body that promote healthy fatty acid oxidation, satiety, energy production, and absorption of nutrients.^{†1,2,3,4,5}

How Ultimate Fat Burner Works

Chromium picolinate is a mineral that may help promote healthy metabolism for weight loss.^{†13} It acts as a cofactor to help support the function of the hormone insulin in processing nutrients.^{†6} Chromium picolinate has a high intestinal absorption rate, allowing it to help promote healthy carbohydrate and lipid metabolism at a molecular level.^{†7,8}

L-carnitine is an amino acid that may help support weight loss through its role of transporting fatty acids into the mitochondria where they are burned for energy.^{†9,10} L-carnitine may also support muscle repair and recovery after a strenuous workout by promoting healthy red blood cell function to transport oxygen throughout the body.^{†11,12}

African mango extract may help support satiety by promoting healthy leptin balance.^{†13} Leptin is a hormone produced by fat tissue. African mango extract works by using leptin to communicate with the brain that the body has stored enough fat and taken in enough calories to ultimately create a feeling of satiety.^{†14}

Ultimate Fat Burner Supplementation

The ingredients in Ultimate Fat Burner are dosed in a manner that is congruous with what research suggests to be effective and safe, particularly for supporting healthy metabolism and body composition.[†] L-carnitine, chromium picolinate, and African mango extract help promote the body's natural ability to burn fat.^{†1,3,5}

Clinical evidence and research cited herein show that the ingredients in Ultimate Fat Burner may:

- Support healthy metabolism and body composition[†]
- Promote the use of fat tissue as energy[†]
- Support healthy blood sugar levels already in a normal range[†]
- Promote muscle repair and recovery[†]

Form: 120 Capsules

Serving Size: 2 Capsules

Ingredients	Amount	%DV
Chromium (as chromium picolinate)	100 mcg	286%
L-Carnitine (as L-carnitine L-tartrate)	500 mg	**
African Mango Extract (seed; <i>Irvingia gabonensis</i>)	150 mg	**
Chromium Picolinate	909 mcg	**

Other Ingredients:

Microcrystalline cellulose, hypromellose, vegetable magnesium stearate, silicon dioxide.

[†] In combination with proper diet and exercise.

Directions:

Take two capsules daily as a dietary supplement, or as directed by your healthcare practitioner.

Caution: If you are pregnant, nursing, or taking medication, consult your healthcare practitioner before use. Keep out of reach of children.

GLUTEN-FREE

DAIRY-FREE

VEGETARIAN

NON-GMO

PRODUCED IN A
cGMP FACILITY
