

CARDIO FLOW

Nutritional Support for Heart, Vascular, and Endothelial Function*

BERRY

Dynamic Cardio Flow Supplementation

Dynamic Cardio Flow provides nutritional support for healthy endothelial function.⁺ The vitamins, essential minerals, phytochemical compounds, polyphenols, amino acids, flavonoids, and polysaccharides in Dynamic Cardio Flow provide antioxidant and healthy immune properties to promote heart, vascular, and endothelial health.⁺

Key benefits of Dynamic Cardio Flow include:

- Promotes endothelial health⁺
- Promotes cardiovascular health⁺
- Promotes vascular health⁺

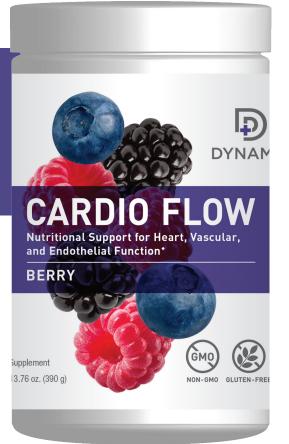

How Dynamic Cardio Flow Works

Endothelial dysfunction is identified by reduced vasodilation and thrombosis.¹ Through the process of releasing nitric oxide, the endothelium relaxes the vascular smooth muscle cells in vessel walls.² Endothelial dysfunction results in inactivation of nitric oxide and loss of vascular tone.^{3,4} Research reveals that endothelial dysfunction may impact cardiovascular risk.³

Dynamic Cardio Flow includes L-arginine and beetroot powder in the formula for their potential impact on vasodilation and nitric oxide bioconversion.^{5,6} Clinical studies have shown beetroot's promising ability to increase in vivo nitric oxide as it relates to healthy heart, vascular, and endothelial function.⁴⁷

The inactivation of nitric oxide may also affect oxidative stress further altering the function of the endothelium.⁴ Oxidative stress and the resulting inflammation may induce vascular and cardiovascular issues.⁸ Hibiscus flower powder and taurine are included in Dynamic Cardio Flow for their endothelial and vascular effects by promoting healthy vascular redox homeostasis and nitric oxide bioavailability.^{+9,10,11}

The proprietary Quatrefolic[®] formula is included in Dynamic Cardio Flow to help support homocysteine levels critical for healthy endothelial, vascular, and cardiovascular function.^{+12,13,14} Clinical studies reveal that folic acid supplementation may play a role in nitric oxide bioavailability and healthy oxidative stress response.^{+12,13,14}

The Dynamic Cardio Flow formula is rounded out with a comprehensive combination of vitamins and essential minerals to support overall health.* Research shows that calcium, iron, magnesium, and sodium may support healthy endothelial, vascular, and cardiovascular function. *15,16

Why Use Dynamic Cardio Flow?

Dynamic Cardio Flow is the ideal nutritional supplement for individuals looking for a comprehensive formula to promote healthy heart, vascular, and endothelial function.* The formula is a rich source of antioxidants, vitamins, minerals, phytochemicals, polyphenols, amino acids, flavonoids, and polysaccharides with a host of health benefits.

Supplement Facts

Serving Size: About 1 Scoop

Servings Per Container: About 30

Ingredients:	Amount	% DV *
Calories	15	
Total Carbohydrate	4 g	1%*
Dietary Fiber	<1 g	3%*
Folate (as [6S]-5-methyltetrahydrofolic acid, glucosamine salt) (Quatrefolic®)	400 mcg DFE	100%
Calcium	55 mg	4%
Iron	1.3 mg	7%
Magnesium (as magnesium citrate)	200 mg	48%
Sodium	45 mg	2%
L-Arginine	3 g	**
Beet Root Powder	2 g	**
Hibiscus Flower Powder	1.5 g	**
Taurine	1 g	**

Other Ingredients: Citric Acid, Silicon Dioxide, Calcium Silicate, Natural Flavors, Inulin, Stevia Leaf Extract, Luo Han Guo Fruit (Monk Fruit) Extract.

Quatrefolic[®] is a registered trademark of Gnosis SpA. Patent No. 7,947,662.

Directions: Mix 1 scoop in 8 ounces of water as a dietary supplement, or as directed by your healthcare practitioner.

Caution: If pregnant, nursing, or taking medication, consult your healthcare practitioner before use. If you have had a heart attack, consult your physician before use. Keep out of reach of children.
