

# Lung Support

Support for Healthy Lung Function\*

Lung Support is a comprehensive blend of potent nutrients with antioxidant properties to promote healthy lung function.\* By promoting healthy oxidative stress responses, Lung Support supplementation also promotes respiratory health.\*<sup>1</sup>

## How Lung Support Works

Antioxidants are the first line of defense in supporting lung health as they scavenge free radicals in the extracellular fluid lining of the lungs.\*<sup>1</sup> The antioxidant capacity of vitamin A promotes overall immune function and the health and well-being of the lungs.\*<sup>2,3</sup> Vitamin A is a fat-soluble retinoid that plays a key role in the healthy formation and maintenance of organs, including the lungs.\*<sup>4</sup>

Vitamin C is an essential micronutrient that humans cannot synthesize so dietary sources or supplementation are necessary.\*<sup>5</sup> Vitamin C also plays a critical role in supporting immune function and promotes respiratory health through numerous cellular functions.\*<sup>5,6</sup> Vitamin C is an effective antioxidant due to its unique ability to donate electrons to free radicals.\*<sup>7,8</sup> Clinical studies demonstrate vitamin C's ability to neutralize free radicals in the lungs and support healthy lung function.\*<sup>8</sup>

Organ meats are highly nutrient-dense and contain numerous vitamins, proteins, enzymes, cofactors, hormones, and minerals.\*<sup>9,10</sup> Raw lung concentrate has been processed to preserve all of these nutrients and provide tissue-specific support for the lungs.\*<sup>9</sup>

## Lung Support Supplementation

The ingredients in Lung Support are dosed in a manner that is congruous with what research suggests to be effective and safe, particularly for supporting healthy lung function.\*

Clinical evidence and research cited herein shows that the ingredients in Lung Support may:

- Promote healthy oxidative stress responses\*
- Promote respiratory health\*
- Support healthy immune function\*
- Support overall health and well-being\*

Form: 90 Capsules

Serving Size: 1 Capsule

Ingredients	Amount	%DV
Vitamin A (50 mcg as beta carotene and 750 mcg as retinyl palmitate)	800 mcg RAE	89%
Vitamin C (ascorbic acid)	90 mg	100%
Raw Lung Concentrate (porcine)	200 mg	**

### Other Ingredients:

Rice flour, gelatin (capsule), vegetable magnesium stearate.

The glandular concentrate in this product is prepared by a special process which does not exceed physiological temperature (37°C) so the natural constituents remain intact.

### Directions:

Take one capsule three times daily or as directed by your healthcare practitioner.

**Caution:** If you are pregnant, nursing, or taking medication, consult your healthcare practitioner before use. Keep out of reach of children.

**Warning:** Excess vitamin A intake may be toxic and may increase the risk of birth defects. Pregnant women or women who may become pregnant should not exceed 3,000 mcg RAE (10,000 IU) of preformed vitamin A (retinyl palmitate) per day.

GLUTEN-FREE

DAIRY-FREE

NON-GMO

PRODUCED IN A cGMP FACILITY
