

BACTICIDX

What Is BACTICIDX?

TonicSea BactiCidX is an all-natural herbal immune support formula containing echinacea root, elderflower/elderberry, and ginger root.* A large body of clinical research suggests that these herbs can help support your natural immune responses.*

Proper immune function is critical for adults, especially if you are regularly in highly contagious environments (like school or an office). BactiCidX by TonicSea is a great way to help you get the herbal ingredients you need for healthy immune function.*

How BACTICIDX Works

BactiCidX is formulated with three potent immune-supporting herbs: *Echinacea purpurea*, *Sambucus nigra* (elderflower/elderberry), and *Zingiber officinalis* (ginger). Numerous clinical trials have been carried out on echinacea preparations, with the results suggesting that the root extract of this herb supports the body's immune function. For this reason, echinacea is sometimes referred to as "nature's immune enhancer."

Ginger is a flowering plant that has also been used in traditional medicine throughout history as a means of aiding digestion, reducing nausea, and supporting immune function.* Ginger contains fragrant polyphenols called gingerols that have been shown to have antioxidant- and immune-supporting roles in the body.*

BactiCidX also contains elderflower and elderberry, which have polyphenols that help support healthy inflammatory response by inhibiting nitric oxide production in certain bodily tissues.*
